                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A33129

testis specific protein - mouse
c:Species: Mus musculus (house mouse)
c:Species: Mus musculus (house mouse)
c:Accession: A33329
c:Accession: A33329
R:KAsshara, M.; Gutknecht, J.; Brew, K.; Spurr, N.; Goodfellow, P.N.
Genomicus 5, 527-534, 1989
A;Ritle: Cloning and mapping of a testis-specific gene with sequence similarity
A;Reference number: A33329
A;Rocession: A33329
A;Status: preliminary
A;Status: preliminary
A;Status: preliminary
A;Molecule type: mRNA

antigen 5 - eastern yellowjacket
C;Species: Vespula maculifrons (eastern yellowjacket)
C;Date: 06.Nov-1992 #sequence_revision 06-Nov-1992 #text_change 11-Jan-2000
C;Accession: B37329
R;Lu, G.; Villalba, M.; Coscia, M.R.; Hoffman, D.R.; King, T.P.
submitted to the Protein Sequence Database, August 1992
A;Reference number: A37329
A;Accession: B37329
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  hypothetical protein ZK384.2 - Caenorhabditis elegans
; Species: Caenorhabditis elegans

Toxicon 28:299-309(1990).

Toxicon 28:299-309(1990).

FUNCTION: Toxin that blocks ryanodine receptors. It is toxic to
mice; it causes lethargy, partial paralysis of rear limbs and
lowering of body temperature.

SUBCELLULAR LOCATION: Secreted.

TSUBCELLULAR IOCATION: Secreted.

SIMILARITY: BELONES TO A FAMILY THAT GROUPS MANMALIAN SCP/TPX1;
INSECTS AG3/AG5; FUNGI SC7/SC14 AND PLANTS PR-1.
                                                                                                                                                                                                                                                                                                                                                                                                               This SWISS-PROT entry is copyright.
